

MAKOMO

RISC-V TECHNOLOGY PLATFORM

Makomo technology development direction for specialised embedded, GNSS/PNT and timing applications

OVERVIEW

Makomo, UAB is a Lithuanian micro-investment and technology development company focused on selected technologies in GNSS/PNT, precise timing, embedded systems and related electronics. The Makomo RISC-V direction is positioned as a broader embedded technology platform rather than only a standalone processor core.

RISC-V Platform Cooperation Model

Makomo is interested in industrial dialogue from early evaluation through platform licensing and long-term integration.

WHERE THE PLATFORM FITS

GNSS/PNT · Precise timing · Real-time embedded systems
· FPGA-based products · Defence & aerospace · Industrial & critical infrastructure

COOPERATION MODEL

Technology evaluation · Use-case definition · FPGA demonstrator · Joint development · Platform licensing · SoC / ASIC integration
